

**Note:** This is Online Appendix 2 of Onyeagoziri, O.J., Shaw, C. & Ryan, T., 2021, 'A system dynamics approach for understanding community resilience to disaster risk', *Jàmbá: Journal of Disaster Risk Studies* 13(1), a1037. <https://doi.org/10.4102/jamba.v13i1.1037>

**Online Appendix 2:**

The use of generic archetypes (diagram by the left) was used to generate the causal loop diagram (CLD) (diagram by the right) for this research cycle. The researcher selected a generic CLD that is applicable to the research. The researcher looked at the research variables and considered how they would fit into the generic CLD. The generic archetype selected is the relative achievement archetype (success to the successful).

**FIGURE 1-A2:** Cycle Two causal loop diagram and the relative achievement archetype.
